

About

SM TRANSLINES was established in the year 1981, have been providing transport service to our customers and we understand the customer needs and realize the importance of quality. We specialize in providing services related to precast construction which has revolutionised the field of construction and take pride in being the only one to provide this service in and around Namakkal.

We believe in quality service and customer satisfaction. Over the years we have gathered a lot of work experience by working with our past clients and understand the importance of time hence delivery in time in our primary goal along with safety. We understand the importance of safety and hence employ people taking into consideration the same. We think of our customers as our long term partners hence try to give our best for building a long relationship with them.

We also take pride in introducing the concept of precast construction for the first time in Pune and take great pride of specializing in 'A' frame Precast trailers. In addition to these trailers we also provide - 40 feet normal high bed trailers, 40 feet semi low bed trailers, 40 feet low bed trailers, 60 feet low bed trailers and 40 feet A frame trailers for precast.

Just try us and you will get a satisfied service and a long term business partner.

Vision & Mission

Provide a consistently trustworthy services.

Precasting

Precasting is a revolutionary step taken in the Construction industry. A precast building is no different than any normal building when it comes to looks, it has same roof, floors, walls etc. The difference is the method in which they are constructed.

In a precast building the elements of a building are manufactured in a controlled environment and are transported with the help of our modified vehicles to destination where these elements are erected and connected. This job of erection and connection takes up very less time hence this method of precasting is time saving. Precasting concept is introduced to minimize efforts, time, money required to construct a building.

Advantages of Precast:

- 1) Construction of buildings with structure beyond imagination is made possible thanks to precast.
- 2) Overall cost is fixed prior to construction hence overheads cost is minimized.
- 3) Reducing the wastage of raw materials used for construction.
- 4) Load bearing walls act as a strong substitute to frame and skeletal structure.

Our A Frame Precast vehicles make all of the above possible for you!

We use

Special Precast A frame Trailers

These trucks are used to carry shipments that are large, heavy and have abnormal proportions, particularly height. These are some of our finest trucks which are used only for transporting special precast frames or material.

Also We Use:

- Low Bed Trailers | 'A' frame Precast Trailers
- | High Bed Trailers | 40ft Normal High Bed Trailers
- | 40 & 50ft Low-Bed Trailers
